

Creating a report using Class Analysis (Tutorial A7)

http://www.atomiclearning.com/k12/en/movie/72083/play_window?type=Tutorial&sid=2137

[00:00:00.00]

You can use student responses from an assignment to create a report of your class's understanding of a topic using

[00:00:07.00]

Class Analysis. To do this, first collect an assignment that contains Question Pages from the class. Next, right

[00:00:16.00]

click on the appropriate assignment in the Class Record, and choose Open in Class Analysis. By default, I can see

[00:00:25.00]

a Class Summary that shows a summary of how all students performed on the assignment. I can use the additional tabs

[00:00:32.00]

to view an analysis by individual student, or by individual item. If you'd like to review the questions with the class,

[00:00:41.00]

click the View Slide Show button in the toolbar. This will open a full-screen view that shows each question in order.

[00:00:49.00]

After you've discussed the question, you can click the right arrow to move to the class results for the question.

[00:00:57.00]

Clicking the right arrow again will move to the next question. When you're done, click the Stop button in the upper-left

[00:01:06.00]

corner to return to the Class Analysis. When you're finished with the analysis, you can either save it to the class

[00:01:13.00]

portfolio by clicking the Save to Portfolio button in the toolbar or if you don't want to save, close the Class Analysis

TI-Nspire™ Software Script

[00:01:21.00]

dialog box. If you haven't saved, you'll be prompted to either save or discard the information. This will close

[00:01:29.00]

the Class Analysis window.
