TI-Nspire™ Software Script

Changing page layout and position (Tutorial A5)

http://www.atomiclearning.com/k12/en/movie/86391/play_window?type=Tutorial&sid=2421

[00:00:00.00]
To change page layout or position, first open your Problem
and navigate to the Page where you would like to change

[00:00:08.00]
the layout. Here, I've got a layout that only has 1 application.
I'd like to add another application to this particular

[00:00:17.00]
layout. To do this, I'm going to click Page Layout, and
then I'll choose Layout 3. Now, I'll click in the new work

[00:00:28.00]
area and insert the Calculator application. Now let's say
I prefer to have the Calculator on the top and a graph

[00:00:36.00]
on the bottom. To do this, I'm just going to
go to the Edit menu, choose Page Layout, and then choose

[00:00:45.00]
Swap Application." Now, I'm going to get that little circle
icon for my pointer, and I can just click on the work area

[00:00:55.00]
where I want to place the Calculator, so I'm going to roll
over the top work area, and then I'll click to swap the

[00:01:02.00]
two applications. If I want to just remove the Calculator
application altogether, I can click on it to make it active,

[00:01:10.00]
then I'll press Ctrl-K to select that work area. Notice
that the highlight begins to blink. Now I'll just press

[00:01:21.00]
Backspace, and the Calculator application has been removed
from the work area. To change the page layout, I'm going

[00:01:30.00]
to use the page sorter on the left side of the screen. Here
you can see that I've got several Pages. I'll select Page

[00:01:38.00]
5 by clicking on it. Let's say that I don't want it to
be in that position, but I would prefer this to be the

[00:01:46.00]
second Page in Problem 1. To do this, I'll click page 5
and drag it. Notice there's a horizontal gray line that

[00:01:56.00]
appears; this indicates the new position of the page. I'll
put the gray line directly below page 1, and then let go

[00:02:05.00]
of the mouse button. Now you can see it jumps right up
there into the second position of Problem 1.

[00:02:13.00]
