TI-Nspire™ Handheld Script

Finding & opening a document (Tutorial A5)

http://www.atomiclearning.com/k12/en/movie/85838/play_window?type=Tutorial&sid=2410

[00:00:00.00]
To locate an existing document, go to the Home screen by
pressing the Home key on the keypad, and then choose My

[00:00:08.00]
Documents. Here, I can see a list of the documents that
I have created and saved on my handheld. Now I'll use the

[00:00:17.00]
Touchpad to highlight the document I want to open, and
then I'll press Enter. Here in my document, I've got three

[00:00:25.00]
problems, and within those problems, I have multiple pages.
To move forward one page at a time, I can press Ctrl and

[00:00:32.00]
the right arrow. I could also use the Touchpad to roll
over a tab, and then click. Here, you can see by the tab

[00:00:43.00]
name that I'm on page 1 of problem 2. If I want to move
backward to page 1 of problem 1, I can press Ctrl and the

[00:00:51.00]
left arrow, or roll over tab 1.1 and click. To get a better
idea of the structure within my document, I'll press Ctrl,

[00:01:02.00]
and then the up arrow on the Touchpad to move into the
Page Sorter view. Now I can see each problem, and within

[00:01:11.00]
each problem, I can see a thumbnail of each page. If I
want to collapse the thumbnails to make the Page Sorter

[00:01:18.00]
easier to view, I can use the Touchpad to highlight the
Problem, and then press the left arrow. In this case, I

[00:01:26.00]
just want to look at the pages within Problem 3. So I'll
highlight Problem 1 using the Touchpad arrows, and then

[00:01:33.00]
press the left arrow to hide the pages within Problem 1.
I'll do the same thing for Problem 2, first highlighting

[00:01:40.00]
Problem 2, then pressing the left arrow. I want to view
page 4 within Problem 3. So I'll use the arrow keys on

[00:01:48.00]
the Touchpad to highlight the thumbnail for that page, and
then I'll press Enter. Now, I can start working within

[00:01:56.00]
my document.
