TI-Nspire™ Software Script

Working with Lesson bundles (Tutorial A10)

http://www.atomiclearning.com/k12/en/movie/86396/play_window?type=Tutorial&sid=2421

[00:00:00.00]
Lesson Bundles are groups of files that have been placed
into one package file. This allows you to move groups of

[00:00:07.00]
files related to a lesson from one computer or handheld
to another, or to groups of computers or handhelds. In

[00:00:15.00]
this case, I've downloaded a Lesson Bundle from the TI
Math Nspired Web site and I put it on my desktop. In the

[00:00:23.00]
Documents Workspace, I click on the Content Explorer. In
the Computer section, I can navigate to my Lesson Bundle.

[00:00:32.00]
To view the contents of this Lesson Bundle, I can click
on the file, and a separate window shows me the contents.

[00:00:40.00]
I can see that this particular Lesson Bundle contains a
TI- Nspire document, two Word documents, and two PDFs. From

[00:00:50.00]
here, I could open any of these files and begin to work
on them by just clicking on the name. I'll click the red

[00:00:58.00]
x to close the window. To create a new Lesson Bundle, in
the Computer section, I'll click on the options menu, and

[00:01:08.00]
choose New Lesson Bundle. When the new Lesson Bundle is
created, I can name it right away, and press Enter. Now

[00:01:18.00]
I can see my new Lesson Bundle in my list of files. I can
now add any files to my Lesson Bundle. On my Desktop,

TI-Nspire™ Software Script

[00:01:27.00]
I have a TI-Nspire document, and also a PDF that I would
like to add. Notice that the Content Explorer only shows

[00:01:35.00]
the TI-Nspire supported document. I'll double click on
the Lesson Bundle, and in the window that opens up, I'll

[00:01:44.00]
choose "Add files to Lesson Bundle." Now I can navigate
to my desktop, hold down the shift key, and click and select

[00:01:53.00]
both files that I want to add. I'll then click "add" in
the lower right corner. In the window, I now see the contents

[00:02:03.00]
of the Lesson Bundle. I can then click the x in the upper right corner
to close the window. If you want to share Lesson Bundles, they need

[00:02:13.00]
to be packaged before they can be shared. For example, let's
say you'd like to e-mail this Lesson Bundle. Packaging the

[00:02:21.00]
Lesson Bundle will create a .tilb file that you can share
with colleagues or students. Right-click on the Lesson

[00:02:29.00]
Bundle, and choose Package Lesson. After a moment, you'll
see a dialog box letting you know it's been successfully packaged.

[00:02:38.00]
You have the option in the dialog box to open the location of the file. I'll
click No in the dialog box. My lesson bundle is ready to share.

[00:02:51.00]
