

TI-Nspire™ Software Script (Teacher Edition)

Updating the OS (Tutorial G1)

http://www.atomiclearning.com/k12/en/movie/75373/play_window?type=Tutorial&sid=1674

[00:00:00.00]

It's important that you make sure your TI-Nspire or TI-Nspire CAS handheld is running the current operating system.

[00:00:07.00]

Before we begin, it's important to note that although all user documents will be unaffected by the OS update, any

[00:00:14.00]

TI-84 applications and files you have on the handheld will be deleted. As a result, if you have any of these files

[00:00:21.00]

or applications that you want to keep, use TI Computer Link to move those onto your computer in an easy-to-remember

[00:00:29.00]

location. Once the OS is updated, use TI Computer Link again to move them back on to the handheld. If you haven't

[00:00:38.00]

already done so, open TI Connect-to-Class. I'll plug my handheld into the computer's USB port and turn it on. Now,

[00:00:48.00]

make sure you have an active Internet connection on the computer, and then go to Help>Check for Handheld OS Update.

[00:00:56.00]

You'll see a dialog box appear after a few seconds, either letting you know that your handheld is up-to-date, or prompting

[00:01:04.00]

you to install the current OS if it's out-of-date. If the OS is out-of-date, you have a few options before you update

[00:01:12.00]

it. The first checkbox will install the OS on the current active handheld. The second box will save a copy of the

TI-Nspire™ Software Script (Teacher Edition)

[00:01:21.00]

OS to a location on your computer's hard drive. You can use the Browse button to specify this location. The third

[00:01:29.00]

checkbox will automatically check for updates. Once you've got those settings the way you want them, click Continue

[00:01:36.00]

to begin downloading and installing the OS. Once the download is complete, Connect-to-Class will automatically launch

[00:01:45.00]

the Transfer Tool with the newly downloaded OS file added as the file to transfer. Simply click "Start transfer" to

[00:01:54.00]

begin installing the OS to your handheld. You may connect multiple handhelds to perform simultaneous updates. The

[00:02:03.00]

update process will take about six minutes for each handheld. When you are done updating all of the desired handhelds,

[00:02:10.00]

click "Stop transfer."

[00:02:14.00]
