

Logging in to a Navigator NC class session (Tutorial A8)

http://www.atomiclearning.com/k12/en/movie/94101/play_window?type=Tutorial&sid=2422

[00:00:00.00]

TI-Nspire Navigator NC allows you to transfer files to and from your student's TI-Nspire Student Software, take

[00:00:07.00]

Quick Polls, view, save, and share screens, and even grade collected assignments automatically. In order for your

[00:00:15.00]

students to log in, first create a class and begin a class session. Next, make sure your computer is connected to

[00:00:23.00]

a school network, and that the connection is active. You can test this in the Navigator NC software by clicking

[00:00:29.00]

on the Class tab, and then going to File > Settings > Teacher Preferences. Under Network Settings, make sure you see

[00:00:39.00]

at least one bullet point with a network name, followed by an IP address in parentheses. If you don't see an IP

[00:00:46.00]

address, you should contact your Network Administrator. I'll close this dialog box. For students to log in to the

[00:00:54.00]

class session, they must be on a computer running TI-Nspire Student Software, and their computers must be on the same

[00:01:01.00]

network as the teacher software. In the student software, go to Tools > Login to a TI-Nspire Navigator Session. In

[00:01:12.00]

the Login dialog box, choose the appropriate class from the drop-down menu. If you do not see the Class, click

[00:01:19.00]

on the question-mark next to the drop down and add the IP Address manually, by typing in the IP Address seen in

[00:01:25.00]

the Network Settings dialog on the Teacher's Nspire software. Now enter the student username and password for the class

[00:01:33.00]

session. Then click OK. You'll see a dialog box letting you know you're logged in, and that your screen may be

[00:01:41.00]

monitored using the Navigator software. If I switch back over to the Navigator NC software, you'll see that Chris'

[00:01:49.00]

name and icon have changed and are no longer grayed out, indicating that he's logged in.
