

Creating a report (Tutorial A7)

http://www.atomiclearning.com/k12/en/movie/86438/play_window?type=Tutorial&sid=2422

[00:00:00.00]

You can use student responses from an assignment or poll to assess your class's understanding of a topic using The

[00:00:06.00]

Review Workspace. To do this, first collect an assignment that contains Question Pages from the class. Next, right

[00:00:15.00]

click on the appropriate assignment in the Class Record, and choose Open in Review Workspace. Next, I'll click on

[00:00:23.00]

the Page Sorter in the Review Toolbox. Here I can see the question page that I sent to the students. Below this is

[00:00:31.00]

a summary of the responses that I can click on. To the right, I see a bar graph of the responses with the question

[00:00:38.00]

shown above. I can also view this as a table by clicking the table icon in the lower right corner. Here I can view

[00:00:47.00]

the responses and their frequency. For different question types there are additional views. Here I have a list question

[00:00:55.00]

and I can click on the graph view. I can also click on the Review Tools. The Review Tools let you organize the

[00:01:03.00]

response data, use graph tools, hide or show responses, and mark Question and Quick Poll responses as correct or

[00:01:10.00]

incorrect. I'll click on Organize, and choose to view this as a Student Table instead, showing how each student responded.

[00:01:19.00]

I can mark answers correct as I review responses. I click on the response and then choose “Mark this response correct”.

[00:01:28.00]

Clicking the Show Correct Answers checkbox will highlight the correct answers in green. In the Review Toolbox, I

[00:01:38.00]

can also click on Students, to see a student list on the left side. There is check box at the top for displaying

[00:01:44.00]

their responses along with their name. When you’re finished with your analysis, you can save it to the Class Portfolio

[00:01:51.00]

by clicking the Save to Portfolio button in the toolbar, and easily incorporate this report as part of your formative

[00:01:58.00]

assessment process.
